CariCRIS reaffirms 'adequate creditworthiness' ratings for The Government of Saint Lucia

CariBBB (Regional Scale Foreign Currency)
CariBBB (Regional Scale Local Currency)

Caribbean Information and Credit Rating Services Limited (CariCRIS) has reaffirmed the assigned ratings of *CariBBB* (Foreign Currency and Local Currency Ratings) on its regional rating scale to the debt issues (US \$38 million, US \$50 million, EC \$140 million, EC \$404.5 million and EC \$189 million) of the Government of Saint Lucia (GOSL), with a **stable** outlook. These ratings indicate that the level of creditworthiness of these obligations, adjudged in relation to other obligations in the Caribbean is **adequate**. The stable outlook is based on our expectation for continued but tepid improvement in real GDP at around 1-2% in 2017, buoyed by good outturn in construction and tourism. Also supporting the stable outlook is anticipated good control over the fiscal deficit at below 2% of GDP and debt, which is expected to marginally decline in FY2017/18 to 65.5% of GDP.

The ratings on Saint Lucia continue to reflect its monetary and exchange rate stability, underpinned by its membership in a quasi-currency board arrangement, a relatively diversified economic base with modest growth, though down from last year and an external sector characterised by moderate balance of payments performances alongside a relatively low external debt position. These rating strengths are tempered by a constrained though improving fiscal position and moderate debt levels, coupled with financial sector weakness.

There is a small manufacturing sector, the most diverse in the Eastern Caribbean, producing clothing, food and beverages, corrugated cardboard boxes, handicraft and sporting goods amongst others, as well as the assembly of electronic components and the processing of lime and coconut. A relatively small financial sector also exists.
